#### Abstract

A random sample of 5,000 Illinois resident hunters was selected from adult 2020 Illinois resident Habitat Stamp and hunting license holders. Selected individuals were mailed an 8-page self-administered questionnaire designed toquery hunters about their hunting activities and harvest in Illinois. We received 2,240 questionnaires, 2,052 of which were usable, for a $42 \%$ response rate. Illinois resident license sales increased 3\% from 2019-20 $(242,704)$ to 249,554 for the 2020-21 seasons. Total days afield decreased for rabbit, quail, pheasant, woodcock, gray squirrel, fox squirrel, turkey, red fox, gray fox, and opossum. Harvest increased for 6 game species (wild pheasant, groundhog, deer, raccoon, gray fox, and coyote) from 2019-20. Hunters were also asked questions regarding hunting activity and harvest in Illinois, proposed hunting regulations, impacts of COVID-19 on hunting, ticks and tick-borne diseases, and perceived effects of Epizootic Hemorrhagic Disease (EHD) and Blue Tongue Virus (BTV) on deer hunting. Estimates of wild quail and pheasant harvested beginning with the 2011-12 season were calculated differently than previous estimates to include harvest of captive-raised birds distinct from wild birds, so comparisons with seasons prior to 2011-12 are to be made with caution.

## OBJECTIVE

To survey resident hunters (18-24 game animal categories) annually to determine their activities and harvest in Illinois.

## METHODS

A random sample of 5,000 hunters was selected from the Illinois resident hunting license database to receive questionnaires regarding harvest(s) in Illinois during the 2020-21 hunting seasons. All Illinois resident license types were included in the sample frame except for Youth License holders ( $n=16,188$ ). Methods for survey questionnaire mailings and follow-up reminders followed those of Miller et al. (1999). We mailed recipients a self-administered, 8-page questionnaire (Appendix A), cover letter (Appendix B), and postage-paid return envelope (hereafter referred to as survey packet) 27 May 2021. This mailing was followed with a thank
you/reminder postcard (Appendix C) 18 June 2021. On 6 July 2021, a survey packet was mailed to nonrespondents, and a second thank you/reminder postcard was mailed 22 July 2021. A final survey packet was mailed 10 August 2021. Data were coded, entered, and analyzed using SPSS 28.0 (SPSS Inc. 2021). Estimates for species harvested, number of hunters, and days afield were computed using the formulas in Anderson and Campbell (1993). Harvest estimates of game species included only those harvested by Illinois resident hunters; non-resident harvests were not included.

The formulas utilized are:
a. Number of hunters for a species, a binomial;

$$
\pm 2 N \sqrt{\frac{p q}{n}}
$$

Where $\mathrm{N}=$ total hunting license sales
$\mathrm{n}=$ number licensees in sample
$\mathrm{p}=$ proportion of licensees in sample hunting a species
$\mathrm{q}=1-\mathrm{p}$
b. Mean season kill per hunter for a species:

$$
\pm \frac{1.96 s}{\sqrt{n_{1}}}
$$

Where $\mathrm{s}=$ standard deviation of mean kill per hunter
$\mathrm{n}_{1}=$ number of licensees in sample that hunted species
c. Total harvest:

$$
\pm 2 N \times \frac{s}{\sqrt{n}} \times \frac{N-n_{1}}{N}
$$

Prior to the 2011-12 license year, no effort was made to distinguish wild pheasant or wild quail from captive-raised birds harvested on put-and-take operations in harvest estimates and reporting. Beginning with the 2011-12 survey, hunters were provided options for separately reporting wild bird and captive bird days afield and harvest. For the 2012-13 season harvest estimates, a different method of reporting was used, and respondents were asked to provide harvest and effort for birds with no prompt as to whether they were wild or captive. In a follow up section, hunters were asked to provide their effort and harvest for shooting preserves.

For that year only estimates for wild effort and harvest were made by subtracting the reported shooting preserve numbers from the total reported. Questionnaires from 2013-14 to present use the 2011-12 line of inquiry, wherein hunters are asked to separately provide wild and non-wild harvest and effort. Therefore, comparisons across years are to be made with caution.

## RESULTS

## Section 1 - Hunter Harvest

## License Sales

We sampled 5,000 Illinois resident hunters and received 2,052 usable questionnaires for a $42 \%$ response rate. A total of 249,554 (including youth) Illinois residents purchased hunting licenses during 2020-21 hunting seasons, a 3\% increase from 2019-20 (242,704; Figure 1.1, Table 1.1).

Figure 1.1. Number of resident hunting licenses purchased in Illinois, 1940-2020.

Most respondents (97\%) reported that they purchased a hunting license during 2020 (Figure 1.2) and $84 \%$ indicated that they hunted in Illinois during the 2020-21 hunting seasons (March 2020 - February 2021) (Figure 1.3). Over one-third (34\%) of hunting license holders reported that they purchased their hunting license online and $59 \%$ of online license purchasers saved their license as a PDF.

Figure 1.2. Percentage of hunters who purchased a hunting license in 2020 ( $n=2,052$ ).

Figure 1.3. Percentage of license purchasers who hunted any wildlife species in Illinois between March 2020 and February 2021 ( $n=1,998$ ).

## Harvest

Harvest estimates for large and small game are presented in Table 1.2; 95\% confidence intervals (CI) for all species are provided in Table 1.3. Harvest estimates for the 14 species excluding deer and turkey are presented by wildlife management units (WMUs) and administrative regions in Tables 1.4-1.38. Maps of WMUs and administrative regions are provided in Appendices F and G. Rail and snipe harvest estimates are no longer included in the questionnaires due to no or extremely low participation and harvest data for these species. Similarly, statewide gray fox harvest was very low. Special care should be given when examining these estimates as low responses ( $n$ ) produce large confidence intervals.

A total of 15 Illinois hunters reported harvesting a total of 49 Eurasian Collared-Doves and 6 were unsure whether they harvested this species duringthe 2020-21 hunting season. Seventy-six Illinois hunters reported downing but not retrieving a total of 219 mourning doves in Illinois during the 2020-21 season and an additional 10 hunters were unsure. One hundred and forty-four hunters reported observing a total of 463 bobcats while furbearer hunting in Illinois during the 2020-21 season. Only $8 \%$ of respondents hunted small game on public land in Illinois during the 2020-21 season. Harvest estimates for all species from 2010-2020 are presented in Table 1.39 and percent change in harvest is provided in Table 1.40. Season dates and bag limits for species hunted are in Appendix H.

Estimates from 2020-21 suggest an increased harvest over the previous year for 6 game species: wild pheasant, groundhog, deer, raccoon, gray fox, and coyote. Decreases in harvest estimates occurred for 9 species: rabbit, wild quail, dove, woodcock, crow, gray squirrel, fox squirrel, turkey, and opossum. Total days afield decreased for rabbit, quail, pheasant, woodcock, gray squirrel, fox squirrel, turkey, red fox, gray fox, and opossum. Rabbit hunting trends (i.e., total days afield and total harvest) from 2002-2013 and 2014 to current year are not directly comparable due to changes in length of the 2014-15 season (Figure 1.4); however, standardizing harvest for all years by the total estimated days hunted per season and harvest/hunter/day made comparisons possible (Figure 1.5). Rabbit hunter effort and harvest reveal that hunter days afield per hunter have remained relatively consistent since 2009. Trends in estimated number of hunters, harvest, and days afield for dove, fox squirrel, gray squirrel, and coyote from 2010-20 are provided in Figures 1.6-1.9.

## Section 2 - Hunter Attitudes and Opinions

## Non-Lead Ammunition

Respondents were asked to indicate how often they used non-lead ammunition while hunting deer, upland game, and/or turkeys in Illinois (Table 2.1). Thirty percent of respondents often or always use non-lead (copper, etc.) shotgun slugs when deer hunting, $19 \%$ rarely or sometimes use non-lead shotgun slugs, and $51 \%$ never use non-lead shotgun slugs. Twenty-three percent of respondents often or always use non-lead (steel, etc.) shot when hunting upland game, $21 \%$ rarely or sometimes use non-lead shot, and $56 \%$ never use non-lead shot. Thirteen percent of respondents often or always use non-lead shot (steel, etc.) when hunting turkeys, $18 \%$ rarely or sometimes use non-lead shot, and $69 \%$ never use non-lead shot.

## Proposed Hunting Regulations

Respondents were asked to provide their level of agreement with statements about proposed hunting regulations in Illinois (Table 2.2). A majority of respondents (54\%) disagreed that nonresident landowners should get free deer and turkey permits same as Illinois resident landowners, $17 \%$ were not sure, and $29 \%$ agreed. Nearly two-thirds of respondents (65\%) disagreed that a certain number of wild turkey hunting permits should be set aside for Illinois outfitters to provide for their clients, $23 \%$ were not sure, and $12 \%$ agreed. Fortysix percent of respondents disagree that airbows should be allowed for deer hunting during the archery deer season in Illinois, $36 \%$ were not sure, and $18 \%$ agreed. Forty percent of respondents disagreed that a separate, private property-only muzzleloader rifle season should be created for hunting in Illinois, $33 \%$ were not sure, and $27 \%$ agreed.

## COVID-19 and Hunting

Most respondents (76\%) indicated that restrictions due to the COVID-19 pandemic did not affect their participation in hunting during the 2020-21 hunting season, whereas hunting participation decreased for $17 \%$ of respondents and increased for 7\% of respondents (Figure 2.1). The most frequent reasons for increased hunting participation in 2020 were: (1) more free time ( $85 \%$ ), (2) need for game meat ( $25 \%$ ), and (3) more hunting partners (15\%; Table 2.3). The most frequent reasons for decreased hunting participation were: (1) health/safety
concerns (38\%), (2) fewer places to hunt (28\%), and (3) less free time ( $24 \%$; Table 2.4). Only $16 \%$ of respondents indicated that the COVID-19 closure of Illinois state public lands affected their ability to hunt or otherwise use those sites. Among respondents who were affected by the closure of state public lands in Illinois, $45 \%$ were prevented from scouting for deer and other fall hunting, $19 \%$ were prevented from hunting spring turkey for the season, $9 \%$ were prevented from participating in spring birdwatching activities, and $31 \%$ were affected in other ways. Nearly half of respondents (49\%) that were affected by the closure of state public lands were able to find substitute activities with $69 \%$ using private land, $15 \%$ going to another state, $14 \%$ using federal land (Shawnee National Forest, etc.), and 10\% finding other substitutes.

Figure 2.1. Impact of COVID-19 restrictions on hunting participation during 2020.

## Hunters and Ticks

About half of respondents have read or heard about preventing tick bites in people (59\%) and/or dogs and other pets (50\%). Among respondents who have read or heard about preventing tick bites, the most common sources of information were: (1) articles on the internet (e.g., social media, online forums, websites) (55\%), (2) articles in newspaper or magazine (41\%), and (3) veterinarians (34\%; Table 2.5). The most frequent tick-borne illnesses that respondents have heard about were: (1) Lyme disease (91\%), (2) Rocky Mountain spotted fever (65\%), and (3) Tularemia (8\%; Table 2.6). Most respondents (84\%) have picked a live tick off of their clothes or body after hunting. Over $60 \%$ of respondents ( $64 \%$ ) have picked a live tick off of deer they have
harvested. Most respondents (78\%) have been bitten by a tick (had it attached to their body). Only $2 \%$ of respondents have ever submitted a tick to be tested after finding it when hunting. Less than half of respondents (45\%) personally know anyone diagnosed with a tickborne illness and $24 \%$ were aware of meat allergies caused by tick bites. Respondents were most concerned about ticks in: (1) tall grass/shrubs (79\%), (2) along the sides of trails (54\%), and (3) on the edges of pasture/fence rows (48\%; Table 2.7).

Forty percent of respondents perceived there was a moderate or high risk of getting bitten by a tick when hunting, whereas $46 \%$ thought there was a slight risk and $14 \%$ felt no risk (Table 2.8). About one-third of respondents ( $32 \%$ ) believed there was a moderate or high risk of being bitten by a tick while they were on their own property, $42 \%$ believed there was a slight risk, and $25 \%$ believed there was no risk. Thirty percent of respondents believed there was a moderate or high risk of contracting a disease from a tick bite, $56 \%$ believed there was a slight risk, and $14 \%$ believed there was no risk. Most respondents felt slight or no risk from tickborne and other illnesses when asked, though feelings of moderate or high risk were greatest for contracting Lyme disease (28\%), West Nile Virus (16\%), and Rocky Mountain Spotted Fever (15\%; Table 2.9). Compared to other disease risks, respondents felt the least risk from becoming ill from Chronic Wasting Disease (8\%), E. coli food poisoning (13\%), and Salmonella food poisoning (13\%).

The most common practice that respondents often or always use to protect themselves from ticks was to wear long-sleeved shirts (59\%), showering immediately when they get home (57\%) and removing clothing and shaking it after returning indoors ( $45 \%$; Table 2.10 ). The least common practices used by respondents to protect themselves from ticks were taping pants legs closed (9\%), tucking their pants into boots/socks (39\%), and wearing DEET or other insect repellent (40\%). Only $18 \%$ of respondents hunted with a dog, though the most common tick bite prevention methods respondents often or always used on their dogs were checking dogs for ticks after being afield (76\%), monthly topical tick preventative (e.g., Frontline, K9 Advantix) (56\%), and oral tick preventative (e.g., Bravecto, Nexgard) (47\%; Table 2.11). The least common tick bite prevention methods used by respondents that hunt with a dog were spray/lotion tick repellent (e.g., OFF) (19\%) and tick repellent collars (e.g., Seresto, Preventic) (30\%).

Approximately $6 \%$ of hunters reported observing dead deer between July and October 2020. These hunters reported seeing a mean of $2.4( \pm 2.4)$ dead deer, and $10 \%$ observed $\geq 5$ dead deer (Table 2.12). Only $12 \%$ of hunters who observed dead deer reported them to the IDNR, and those hunters reported an average of $1.7( \pm 0.9)$ deer. Counties in which most dead deer were observed included Adams, Pike, Fulton, Hancock, and Schuyler (Table 2.13). Twenty-five percent of deer hunters believed that EHD \& BTV had decreased the number of deer in the areas they hunted, $70 \%$ saw no change, and $5 \%$ indicated deer populations increased (Figure 2.2 and Table 2.14). Thirty-six percent of Illinois deer hunters believed that EHD and BTV has decreased the deer population during 2020 throughout the entire state, $52 \%$ believed there was no change, and $12 \%$ indicated the statewide deer population increased (Table 2.15). Twenty-six percent of Illinois deer hunters reported that they saw more deer during the 2020-21 deer seasons than the 5 years prior, whereas $46 \%$ of deer hunters reported seeing fewer deer and $28 \%$ saw no change (Table 2.16).

Figure 2.2. Perceived impact of EHD and BTV on the deer population during 2020 in areas that respondents typically hunt.

## Background Information

Over forty percent of respondents would like reminders to renew their hunting license every year. Of hunters willing to receive reminders, the most preferred method of contact was email (77\%), followed by text ( $47 \%$ ), and $14 \%$ wanted social media reminders (Table 2.17). Over sixty percent of respondents ( $61 \%$ ) would
like reminders about permit due dates and the most preferred methods of contact were email (74\%), text (47\%), and social media ( $15 \%$; Table 2.18). Forty-four percent of respondents indicated that they have missed a permit application deadline because they did not know it was due. Eighteen percent of respondents received announcements from IDNR in their email, $17 \%$ used to get them, and $66 \%$ did not receive email announcements from IDNR. One-quarter of respondents (26\%) have signed up for email announcements from IDNR. Most respondents ( $63 \%$ ) indicated that they would use a website that would allow them to search the number of animals harvested by species and number of hunters that used each IDNR site by year and season. Most respondents (66\%) would use a website that would show the number of permits allocated by species for each IDNR site per year. Most (90\%) respondents have Internet access in their home and $83 \%$ reported having high-speed Internet access. Nearly one-third (32\%) of respondents purchased their hunting license at a local sporting goods store, $32 \%$ online from the IDNR, $29 \%$ from a large chain store (Walmart, etc.), and $7 \%$ from a chain sporting goods store (Dick's, Bass Pro, Scheel's, etc.; Table 2.19). Respondents to the 2020-21 Hunter Harvest Survey were mostly male (93\%), had a mean age of 52.9 years old, and had been hunting for an average of 31.2 years. Most respondents indicated their race/ethnicity is White (94\%), $1.4 \%$ are Native American (American Indian), $1.0 \%$ are Latino or Hispanic, $0.6 \%$ are Black, $0.4 \%$ are Asian-American, and $1.2 \%$ are another race/ethnicity. Most frequently listed counties of residence were Cook, Madison, St. Clair, Sangamon, and Will.

## Illinois Hunter Harvest Survey 2020-21 Seasons

Illinois Department of Natural Resources
Division of Wildlife Resources
\&
Illinois Natural History Survey

ILLINOIS NATURAL HISTORY SURVEY
PRAIRIE RESEARCH INSTITUTE

The Department of Natural Resources is requesting disclosure of information that is necessary to accomplish the statutory purpose as outlined under the Illinois Compiled Statutes, The Wildlife Code, Chapter 520. Disclosure of information is voluntary. This study is funded by the federal Wildlife Restoration Fund through your purchase of hunting arms and ammunition.

## THANK YOU FOR YOUR PARTICIPATION!

All your responses will be kept confidential.
Please return this survey in the postage-paid return envelope provided.

Section 1. Hunting Activity and Harvest in Illinois. Please provide the following information to allow IDNR biologists to monitor game species harvest and conserve wildlife populations in Illinois.

1. Did you purchase a hunting license during 2020 ? $\qquad$ Yes $\qquad$
2. Did you purchase your hunting license online?

2a. If "Yes" do you save your license as a PDF? $\qquad$ Yes
$\qquad$ No No
3. Did you hunt any wildlife species in Illinois between March 2020 and February 2021?
$\qquad$ Yes
No (If "No," please go to Section 2)
4. Please report your hunting effort and harvest in Illinois for the following species between March 1, 2020 - February 28,2021 . Include only game harvested and days you personally hunted in Illinois. Count only game you retrieved; do not count animals you were not able to retrieve or animals that were trapped. Count any part of a day hunted as 1 day.

| Species | Number of Days Hunted | Number <br> Harvested | County Hunted Most Often |
| :---: | :---: | :---: | :---: |
| Rabbit |  |  |  |
| Quail (shooting preserve, club, etc.) |  |  |  |
| Quail (wild) |  |  |  |
| Pheasant (shooting preserve, club, etc.) |  |  |  |
| Pheasant (wild) |  |  |  |
| Dove |  |  |  |
| Woodcock |  |  |  |
| Crow |  |  |  |
| Groundhog (Woodchuck) |  |  |  |
| Gray Squirrel |  |  |  |
| Fox Squirrel |  |  |  |
| Turkey - Spring |  |  |  |
| Turkey - Fall Shotgun |  |  |  |
| Turkey - Fall Archery (compound \& recurve only) |  |  |  |
| Turkey - Fall Archery (crossbow only) |  |  |  |
| Deer - Regular Firearm Season |  |  |  |
| Deer - Muzzleloader-Only Season |  |  |  |
| Deer - Archery Season (compound \& recurve only) |  |  |  |
| Deer - Archery Season (crossbow only) |  |  |  |
| Deer - Late Winter Firearm Season |  |  |  |
| Deer - Special CWD season |  |  |  |
| Raccoon |  |  |  |
| Red Fox |  |  |  |
| Gray Fox |  |  |  |
| Coyote |  |  |  |
| Opossum |  |  |  |

5. Did you harvest any Eurasian collared-doves in Illinois during the 2019 season?
$\qquad$
6. Did you have any mourning doves downed but not retrieved in Illinois during the 2020 season?
$\qquad$ Yes If "Yes," how many? $\qquad$
$\qquad$ No $\qquad$ Not sure
7. If you hunted furbearers did you observe bobcats while furbearer hunting?
$\qquad$ Yes If "Yes," how many? $\qquad$
$\qquad$ No
8. Did you hunt small game on Public Land in Illinois during the 2020-21 season? $\qquad$ Yes $\qquad$ No
9. How often do you use non-lead ammunition? Please circle the number that matches your response.

| Ammunition | Never | Rarely | Sometimes | Often | Always |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Non-lead (copper, etc.) shogun slugs for deer | 1 | 2 | 3 | 4 | 5 |
| Non-lead shot (steel, etc.) for upland game | 1 | 2 | 3 | 4 | 5 |
| Non-lead shot (steel, etc.) for turkeys | 1 | 2 | 3 | 4 | 5 |

Section 2. Proposed Hunting Regulations. Please provide your level of agreement for the following statements by circling the number that matches your response.

|  | Strongly <br> Disagree | Disagree | Not <br> Sure | Agree | Strongly <br> Agree |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Nonresident landowners should get free deer and turkey <br> permits same as Illinois resident landowners. |  |  |  |  |  |
| A certain number of wild turkey hunting permits should <br> be set aside for Illinois outfiters to provide for their <br> clients. | 1 | 2 | 3 | 4 | 5 |
| Airbows should be allowed for deer hunting during <br> archery deer season in Illinois. | 1 | 2 | 3 | 4 | 5 |
| A separate, private property-only muzzleloading rifle <br> season should be created for hunting in Illinois. |  |  |  |  |  |

Section 3. COVID-19 and Hunting. Please consider restrictions due to the COVID-19 pandemic and respond to the following statements.

1. Which of the following best describes how restrictions due to the COVID-19 pandemic affected your participation in hunting during 2020. Please choose one response.
___ Increased (Please go to question 2)
___ Stayed the same (Please go to question 4)
___ Decreased (Please go to question 3)
2. Which of the following best describe why your participation increased. Please choose all that apply.
$\qquad$ More free time $\qquad$ More hunting partners
$\qquad$ More places to hunt
Increased finances
$\qquad$ Need for game meat More permits available
3. Which of the following best describe why your participation decreased. Please choose all that apply.
$\qquad$ Less free time Fewer/no hunting partners Fewer permits available Fewer places to hunt
___ Decreased finances Other (Please identify):
$\qquad$ Health/Safety concerns
$\qquad$
$\qquad$
$\qquad$
4. Did the COVID-19 closure of Illinois state public lands affect your ability to hunt or otherwise use those sites?
$\qquad$ Yes $\qquad$ No

4a. If yes, which of the following best describes how the COVID-19 closure affected you. Please check all that apply.
$\qquad$ Prevented me from hunting spring turkey for the season
$\qquad$ Prevented me from scouting for deer and other fall hunting
$\qquad$ Prevented my spring birdwatching activities
___ Other (please identify):
4b. Were you able to find substitute activities? $\qquad$ Yes $\qquad$ No

4 c . If yes, which of the following did you do as substitute? Please check all that apply.
$\qquad$ Used private land
$\qquad$ Used federal land (Shawnee National Forest, etc.)
$\qquad$ Went to another state
$\qquad$ Other (please identify): $\qquad$

## Section 4. Hunters and Ticks.

1. Have you read or heard about preventing tick bites?
$\qquad$ Yes, in dogs and other pets
Yes, in people
$\qquad$ No
2. If "Yes," where have you encountered this information?

| Pamphlet | Article in news <br> Poster4 <br> Veterinarian |
| :--- | :--- |
| Medical profes <br> Other | Articles on the |

3. Have you heard of any of the following tick-borne illnesses? (Please check all that apply.)
$\qquad$ Anaplasmosis $\qquad$ Babesiosis $\qquad$ Borrelia infection

Lyme disease ___ Tularemia ___ Ehrlichiosis

Bourbon virus $\qquad$ Rocky Mountain spotted fever
4. Have you ever picked a live tick off of your clothes or body after hunting? $\qquad$ No
5. Have you ever picked a live tick off of deer you have harvested? $\qquad$ Yes $\qquad$ No
6. Have you ever been bitten by a tick (had it attached to your body)? $\qquad$ Yes $\qquad$ No
7. Have you ever submitted a tick to be tested after finding it when hunting? $\qquad$ Yes $\qquad$ No
8. Do you personally know anyone diagnosed with a tickborne illness? $\qquad$
$\qquad$ No
9. Are you aware of meat allergies caused by tick bites? $\qquad$ Yes $\qquad$ No
10. In which of the following areas are you concerned about ticks? (Please check all that apply.)
$\qquad$ Tall grass/shrubs $\qquad$ Leaf litter in forest
$\qquad$ Along the sides of trails $\qquad$ On animals' skin or coat
___ On the edges of pasture/fence rows $\qquad$ I don't know
$\qquad$ Other (Please specify) $\qquad$
11. How much risk do you feel from the following? Please circle the number that matches your response.

|  | No <br> Risk | Slight <br> Risk | Moderate <br> Risk | High <br> Risk |
| :--- | :---: | :---: | :---: | :---: |
| Getting bitten by a tick when hunting | 1 | 2 | 3 | 4 |
| Getting bitten by a tick on your property | 1 | 2 | 3 | 4 |
| Contracting a disease from a tick bite | 1 | 2 | 3 | 4 |

12. How much risk do you feel from the following? Please circle the number that matches your response.

|  | No <br> Risk | Slight <br> Risk | Moderate <br> Risk | High <br> Risk |
| :--- | :---: | :---: | :---: | :---: |
| Contracting Lyme Disease | 1 | 2 | 3 | 4 |
| Contracting Rocky Mountain Spotted Fever | 1 | 2 | 3 | 4 |
| Becoming ill from Chronic Wasting Disease | 1 | 2 | 3 | 4 |
| Becoming ill from Salmonella food poisoning | 1 | 2 | 3 | 4 |
| Becoming ill from E. coli food poisoning | 1 | 2 | 3 | 4 |
| Contracting West Nile Virus | 1 | 2 | 3 | 4 |

13. How often do you practice the following to protect yourself from ticks? Please circle the number that matches your response.

|  | Never | Rarely | Sometimes | Often | Always |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Tuck pants into boots/socks | 1 | 2 | 3 | 4 | 5 |
| Wear long-sleeved shirts | 1 | 2 | 3 | 4 | 5 |
| Tape pants legs closed | 1 | 2 | 3 | 4 | 5 |
| Wear DEET or other insect repellent | 1 | 2 | 3 | 4 | 5 |
| Remove clothing and shake it after returning <br> indoors | 1 | 2 | 3 | 4 | 5 |
| Showering immediately when you get home | 1 | 2 | 3 | 4 | 5 |

$\qquad$ Yes
15. If you answered "Yes" to the previous question, how often do you use the following tick bite prevention methods on your dog? Please circle the number that matches your response.

|  | Never | Rarely | Sometimes | Often | Always |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Spray/lotion tick repellent (e.g. OFF) | 1 | 2 | 3 | 4 | 5 |
| Tick repellent collar (e.g. Seresto, Preventic) | 1 | 2 | 3 | 4 | 5 |
| Monthly topical tick preventative (e.g. Frontline, K9 <br> Advantix) | 1 | 2 | 3 | 4 | 5 |
| Oral tick preventative (e.g. Bravecto, Nexgard) | 1 | 2 | 3 | 4 | 5 |
| Check dog for ticks after being afield. | 1 | 2 | 3 | 4 | 5 |

Section 6. EHD and BTV in White-tailed Deer in Illinois. Please answer the following questions about white-tailed deer and Epizootic Hemorrhagic Disease (EHD) and Blue Tongue Virus (BTV) in Illinois during 2020.

1. Using the table below, please report the number of dead deer you saw in or next to bodies of water (creeks, ponds, lakes, etc.) from July through October 2020. Report ONLY deer that (1) YOU actually saw; (2) were fresh enough to have died DURING the July-October period; (3) were IN or BESIDE a water source; and (4) DID NOT show any visible signs of trauma (broken bones or other wounds). DO NOT report deer that someone else told you about, if you did not actually see them.

Did you observe dead deer in this period?
$\square$ Yes $\square$ No No

$\square$ dead deer

If Yes, how many dead deer, meeting the criteria above did you see?

Did you report any of the dead deer you observed to the IDNR?

If Yes, how many dead deer did you report to the IDNR? Yes $\qquad$ No $\square$ reported
2. In which county did you observe the most deer that you believe died from EHD or BTV? $\qquad$ County
3. How do you think EHD and BTV impacted the deer population during 2020 in areas you typically hunt? Please circle the number that matches your response.

| Decreased <br> Considerably | Decreased <br> Moderately | Decreased <br> Slightly | No <br> Change | Increased <br> Slightly | Increased <br> Moderately | Increased <br> Considerably |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

4. How do you think EHD and BTV impacted the deer population during 2020 throughout the entire state? Please circle the number that matches your response.

| Decreased <br> Considerably | Decreased <br> Moderately | Decreased <br> Slightly | No <br> Change | Increased <br> Slightly | Increased <br> Moderately | Increased <br> Considerably |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

5. How did the number of deer you saw during the 2020 season compare to 5 years ago? Please circle the number that matches your response.

| Decreased <br> Considerably | Decreased <br> Moderately | Decreased <br> Slightly | No <br> Change | Increased <br> Slightly | Increased <br> Moderately | Increased <br> Considerably |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|  |  |  | 59 |  |  |  |

Section 7. Background Information. The following questions allow us to understand more about the people involved in hunting in Illinois. All responses are kept confidential.

1. How many years have you hunted in Illinois? $\qquad$ Years
2. Do you have Internet access in your home? $\qquad$ Yes $\qquad$
2a. If "yes," do you have high-speed Internet access? $\qquad$ Yes $\qquad$ No No
3. Would you like reminders to renew your hunting license each year? $\qquad$ Yes $\qquad$ No

3a. If yes, how would you like to be reminded? Please check all that apply.
$\qquad$
$\qquad$ Email $\qquad$ Social media
4. Would you like reminders about permit due dates? $\qquad$ Yes $\qquad$ No

4a. If yes, how would you like to be reminded? Please check all that apply.
$\qquad$ Text $\qquad$ Email $\qquad$ Social media
5. Have you missed a permit application deadline because you did not know it was due?
$\qquad$ Yes $\qquad$ No
6. Do you received announcements from IDNR in your email?
$\qquad$ Yes $\qquad$ Not now, but I used to get them $\qquad$ No
7. Did you sign up for email announcements from IDNR? $\qquad$ Yes $\qquad$ No
8. Would you use a website that would allow you to search the number of animals harvested by species and number of hunters for each IDNR site by year and season?.
$\qquad$ Yes $\qquad$ No
9. Would you use a website that would show the number of permits allocated by species for each IDNR site per year?.
$\qquad$ Yes $\qquad$ No
10. Which of the following best describes how you purchase your hunting license? Please choose one response.
$\qquad$ Local sporting goods store
Chain sporting goods store (Dick's, Bass Pro, Scheel's, etc.)
Large chain store (Walmart, etc.)
On-line from IDNR
11. What is your county of residence?
13. Please give your age. $\qquad$ Years
14. Please give your race/ethnicity. Please check all that apply.
$\qquad$ White
$\qquad$ Black
$\qquad$ Asian-American
$\qquad$ Latino or Hispanic
$\qquad$ Native American (American Indian)
$\qquad$ Other (please specify) $\qquad$

## THANK YOU FOR YOUR TIME AND ASSISTANCE!

Please return this survey in the postage-paid envelope provided.
The Illinois Department of Natural Resources receives federal assistance and therefore must comply with federal anti-discrimination laws. In compliance with the Illinois Human Rights Act, the Illinois Constitution, Title VI of the 1964 Civil Rights Act, Section 504 of the Rehabilitation Act as amended, and the U.S. Constitution, the Illinois Department of Natural Resources does not discriminate on the basis of race, color, sex, national origin, age, or disability. If you believe you have been discriminated against in any program, activity, or facility, please contact the Equal Employment Opportunity Officer, Department of Natural Resources, One Natural Resources Way, Springfield, IL 62701-1787, (217) 782-7616 or the Officer of Human Resources, U.S. Fish and Wildlife Service, Washington, D.C. 20240.

## IlLinois Natural History Survey

Prairie Research Institute
University of Illinois at Urbana-Champaign

Dear Illinois Hunter,
Your name was randomly selected from the list of 2020 Illinois hunting license purchasers. We are asking you to provide information about your activities during the 2020-2021 hunting seasons in Illinois. Even if you did not hunt in Illinois during the 2020-2021 seasons, we ask that you please take a few minutes to complete the portions of the questionnaire that pertain to you. A postage paid envelope is provided for returning the questionnaire to us.

This study, jointly conducted by the Illinois Department of Natural Resources and the Illinois Natural History Survey, is an effort to learn about hunting activities in Illinois. Results of this study will help wildlife managers make decisions to improve hunting opportunities and to better manage Illinois’ wildlife populations. Your responses are voluntary and completely confidential. By responding you will help us more effectively manage wildlife and hunting in Illinois.

If you do not wish to participate, please return the blank questionnaire so we can remove your name from our mailing list.

You may access the results of this and other studies of hunters and hunting in Illinois at https://publish.illinois.edu/human-dimensions/. You may also find information about Illinois Department of Natural Resources wildlife management programs and wildlife in Illinois at https://www.dnr.illinois.gov/conservation/wildlife/.

If you have questions regarding this study, please call us at (217) 244-5121.

Craig A. Miller
Human Dimensions Research Program

## Appendix C

Dear Illinois Hunter,
Recently you were mailed a questionnaire about your hunting activities in Illinois. We have not yet received your response. If you have already returned the questionnaire, we thank you. If you have not returned the questionnaire, please do so as soon as possible. Your input is very important!

Your name and address will be deleted from our mailing list when your questionnaire is received. Thank you for your time and cooperation.

## IlLinois Natural History Survey

Prairie Research Institute
University of Illinois at Urbana-Champaign

Dear Illinois Hunter,
Your name was randomly selected from the list of 2020 Illinois hunting license purchasers.
We recently mailed you a questionnaire regarding your hunting experiences in Illinois during the 2020-2021 hunting seasons. If you have already returned the questionnaire, we thank you.

If you have not returned your completed questionnaire, please do so as soon as possible.
We have enclosed another copy for you. The information you and other selected hunters provide will help wildlife managers make decisions to improve hunting opportunities and to better manage Illinois' wildlife populations. Your responses are voluntary and completely confidential.

Even if you did not hunt in Illinois during the 2020-2021 seasons, we ask that you please take a few minutes to complete the portions of the questionnaire that pertain to you. A postage paid envelope is provided for returning the questionnaire to us.

You may access the results of this and other studies of hunters and hunting in Illinois at https://publish.illinois.edu/human-dimensions/.
